### **Protective performance fabric technologies**

The Cordura brand of the fiber producer Invista S.à.r.l., Wichita, KS/USA, is broadening its portfolio of protective performance fabric technologies suitable for today's workwear environments. The latest innovations on display at A+A Show in Düsseldorf/Germany from October 17-20, 2017 will range from flame-retardant solutions featuring Cordura fabric technology for enhanced durability to specialist stretch materials for garment reinforcement.

On show at the A+A will be Hi-Vis Laminates, the new Cordura brand high visibility, lightweight, waterproof, durable 2 and 3-layer laminated fabrics for outerwear at 140-220 g/m<sup>2</sup>. Also on display will be FR solutions with a range of flame-retardant coated fabrics engineered with Cordura fiber technology for enhanced abrasion resistance, and stretch reinforcements, an enhanced range of high-tenacity polyester and PA 66 Cordura fabrics with Lycra T400 stretch technology for workwear garment reinforcement. Cordura Denim, Cordura 4Ever Knits and Cordura fabrics with Susterra, bio-based membranes and coatings for safety footwear and outdoor apparel, can also be viewed by visitors.
